ATP 2030 transcript

Speaker 1

0:07

The University tower chimes ring in another session of Ask The professor the show on which you match with the University of Detroit mercy professors in an unrehearsed session of questions and answers. I'm your host Matt Mio and let me introduce to you our panel for today. To my left. It's Professor Dave Chow, pleasure to be here. Thank God I can swell up fast. Every time I'm going to introduce you he was just stuffing your, I was just intro, and then chasing it with a vitamin D water here. Vitamin D, or no Vitamin Water sorry my best, just in bad placement for the power see you want to keep that coronavirus away. Please let's keep the thing far away. I just started a lot of students talking as they do about traveling over break and every time I gave them sort of a like. I hope you're okay kind of face and they're like what do you mean like you're going to an airport, they're like, Whoa, this is heavy. I'm not saying travel in April so everything's heavy. I have to travel in a few weeks to Philadelphia and I'm not looking forward to it. If the

masks are going to cost like \$500 or whatever it is, you know, they're getting close. marking them up and everything. Well I saw pictures from my cousin's in China liquid buying the bulk. Oh, yeah. Absolutely, like big

Speaker 2

1:20

blister packs like Google the our 95 masks that last night and it's, it was like five of them for \$89 and stuff like

1:28

that crazy, you mean you don't trust my parents to, you know, keep the song

1:32

going to keep us all safe safe safe

Speaker 1

1:40

safe to the tune of another thousand point loss. Sanders in 2020. Barry Sanders. Professor Jim Tubbs is with us. Hello. How are you doing, I'm okay so far. So you haven't been hit hard by the stock market yet. Well yes so sorry.

1:59

Yeah, that was a I guess we could have predicted that but was rather dramatic. Yeah, Jim and I will be doing shows on the street corner really shouldn't have looked.

Speaker 1

2:10

Yeah, there was already an article like happens every time this morning on CNN that was all about well maybe we should add five more years before retirement, you know things like to lay

2:22

eggs. Professor Beth soldiers with the students

2:25

or not fire government scientists that might actually be a start from the CDC, we have the mean Tony falchi, seriously. We doesn't get to speak publicly,

2:37

the greatest opportunity, the United States has to develop a vaccine. We may be saving the world but why is that so

2:47

we have an immunologist with us I'm waiting to see what she has to say, what I'm wondering is whether they will relax the, the phase requirements

2:56

for FDA approval of a vaccine. Yeah.

3:02

There is no me but now I'm testing it now.

3:05

They are distorted should

3:09

I be surprised.

Speaker 3

3:12

The only time they've relaxed, it has been for the Ebola. Yeah. And then there's one other time that they relaxed. Perfect same purpose h1 in one.

3:24

Yeah, but with a bola and bird flu we actually have competent people in the government, dealing with problems,

Speaker 1

3:30

right. So this should be very, this should be very easy to see how the herd gets thinned by the virus in the United

States. And now I can introduce our resident immunologist Professor Stephanie Conant. Hi. No pressure. I'm thinking, this is just a field day if you're teaching immunology. This is

3:52

frustrating.

3:54

Well, why is it fresh looking at the response here like.

3:58

I saw could be used against coronavirus it's all a scam and I'm like Corona virus is just a class of viruses they've been around for hundreds of years.

4:08

It sounds sometimes in the news that it just sprung out of

nowhere.

4:12

It didn't kill us all, you had students who tell you they don't want to vaccinate their kids. No. Well most students don't have kids. So,

4:24

kids are not getting it No,

4:26

they're not. If they get it it's mild

Speaker 3

4:28

yeah there was a separate, there's a separate issue right people who decide they don't want to vaccinate their kids. I mean I talked about debunking the

4:38

anti vaxxers and you know where they're getting information where they should they shouldn't.

4:44

It doesn't matter when the vaccine gets generated they're not going to use it anyway so we will all be cool.

4:50

Whatever fall apart decompose on a molecular level whatever

Speaker 3

4:54

it is we got a lot of people may get the coronavirus I don't think it's going to be, I could be very wrong but I don't think it's gonna be much worse than she then fluids in the year. 2000 people. Well, the President wasn't aware that people ever died from flu. Yeah, right. That's right It's

5:12

crazy. I got my flu shot. Excellent, a

5:17

professor Dan Maggio get a flu shot this year I did, I always get my flu shot so it's good. You a September October kind of guy.

5:26

You just walk in the doors at Walgreens roll up your sleeve and Yep, that's right.

5:32

Are you gonna punch the injection, I actually got my

5:37

pneumonia shot. I got my first ammonia, real oh I don't remember that 10 years later when I get the second one,

5:44

remember getting the first one. It apparently be more effective.

5:47

Oh good.

5:48

We need to stamp, or something like that. I felt really prepared for later.

5:53

Did you get your shingles vaccine. Oh I did

5:57

both of them. We talked about that at the break.

6:02

Professor Stephen Manning is joining me this morning, afternoon. Sorry, I was thinking about needles needles freaked me out. Really,

Speaker 1

6:14

I made a incidental indirect joke at the dinner table the other day about blah blah blah and I hope they don't get cobit 19, and my seven year old was like, you should joke about.

6:28

Nice. Chill

6:34

punchy.

Speaker 1

6:38

Yeah, they go to a great school where the banner when you walk in is wash your hands and say your prayers because the germs and Jesus are everywhere. so you know I don't know what else to say about that.

6:48

I mean if it works, whatever cool new way of making the cleanliness is next to

6:52

godliness. Yeah, that's right. Yes. Professor Heather Hill is here with us today. Hello. See what could we know, keeping with the theme of needles and health.

7:05

I just have my annual physical got a tetanus shot

7:10

and found out that I'm deficient in vitamin D.

Speaker 3

7:16

Bring your happy lamp What about your happy lamp does I

7:20

do some bagged milk. No, no, she just put me on

7:23

vitamin D so

7:25

it'll be okay,

Speaker 2

7:27

we'll move to Scottsdale, after I moved to Michigan, the very first Christmas, that's happy lamp is what I want.

Speaker 1

7:37

Well, we'll get you the sun that that you and your perennial plantings will need Yeah, it's

7:43

coming looking forward to it it's coming.

Speaker 1

7:46

Strange. Folks, this is a program where you can send us questions regarding anything strange things actually that would be kind of nice if you stop the price if you don't stop the panel you win a prize you can send us the questions in a number of ways you can email us at ATP at UT mercy that Edu reach us on the web@university.edu slash ATP. You can find us on the Facebook or listen on your favorite smart speaker by asking you to play ask the professor at University of Detroit mercy who knows what else your smart speaker is listening to you say you were

8:16

doomed to get a prize.

Speaker 1

8:21

Oh my, this is awesome. Hey, Professor Mio in panel. You recently were singing TV theme songs to ignore that you enjoyed that and here are 20 name match show is might be a bit challenging, but I'm going for 80%. They're all from his shows happy singing Brian's stole sto LI of Elmira New York

8:46

today and Demolition Man jingles are the are all the radio plays.

Speaker 1

8:53

Just you don't have to sing, and talk about match. No, I'm not gonna sing them because it's gonna be way more entertaining for me to do it it's sort of like a Bryan Cranston like monotone monotone, and then really

9:05

pick it up together, I think we should determine whether it would be more entertaining for you to save

9:11

time for a break.

9:14

You take the good. You take x y x otherwise. Whoa. Okay, Dan.

9:24

That's a normal Portuguese for him. Well sugar.

9:28

Isn't pneumonia shot. What was

Speaker 1

9:33

interesting side fact about the lyrics to a very well known, you know, hit TV show these lyrics in the song were used only at the start of the second season. In the first season it was a different song that said things to be akin to. There's a place you got to go for learning, all you want to know about the facts of life, you know that

9:52

Dan. I did not

9:54

pletely different theme song season one different characters, Mrs. Garrett was 10 feet tall, totally different.

Speaker 1

10:03

Whatever happened to predictability, the milkman the paper boy evening TV. Sounds like Archie Bunker or family, your deal need to go a little further a few more years, Norman Lear. What's the next time that you please don't have that your repeat that one more time. Sure. Whatever happened to predictability, the milkman the paper boy evening TV.

10:28

Whatever happened to predictability.

10:30

Here we go.

10:34

See a couple more hours I have three sons,

10:39

forward,

10:41

forward, soon all the forward. After

Speaker 1

10:46

would have been 10 years 12 years after the late 1980s
80s wasn't watching it recently had a reboot. Saved by
the Bell, new, you're getting closer.

11:00

And it's no no no,

Speaker 1

11:02

it wasn't that one. What was that right 80s early 90s when Mark though. I can give you a clue that'll give it away completely How about cut it. Oh Fuller House full house.

11:15

I was just thinking of the show with Bob Saget, yeah.

11:20

Bob Saget.

11:23

Oh,

11:27

saw when I went for the Detroit connection to Dave
coulier A

11:30

Crites somebody saw him at

11:34

a cool job.

Speaker 1

11:37

Tell me why I love you like I do. Tell me who can stop my heart as much as you know they don't give me more lyrics so if I didn't know, singing, some of it. I they ran the word predictability with evening TV so that's kind of a big feel like I've given this major perhaps mad. It's Mad About You, that's a bonus point for Professor old jars she can say or anybody. The name of the song, sort of like think mashes suicide is painless like what is the name of the song that's the theme to Matt about you.

12:12

It has a little bit of a Star Trek twinge to it, Tiberias.

12:18

It's called The Final Frontier.

Speaker 1

12:22

Hey baby, I hear the blues, a call it frager. Toss salads, yes ramblings Yes, which apparently is code for psychosis. It wasn't, I knew it wasn't the dating game so

12:37

a baby

12:39

blues a column,

Speaker 1

12:41

early to rise. Early to bed in in between I cooked and cleaned and went out of my head.

12:48

This is an absolutely classic show from the 80s

12:51

house. Alice yes Linda

12:54

Lavin Linda, Linda lab.

12:56

Yes, Margaret Mel's diner.

12:59

My dad love that Shelby's ever reminded him of his diner.

13:02

Oh, that's nice. We're gonna do it, overdone surely oh yes Laverne,

Speaker 1

13:09

give us any chance we'll take it read us any rule, we'll break it, we're gonna make our dreams kinds of shots brewery doing it our way. By the way, the theme song sung by Cindy Greco made it to number 25 and the Billboard Hot one remember those song those days. Remember,

13:31

look at what's happened to me. I can't believe it but

13:37

on top of the world.

13:39

That was the one I gave is my favorite.

13:42

Do you remember that they changed his name. And really, after the reagan shooting.

13:49

Yeah, please who's who's gentlemen shot Reagan john Tarling, he was supposed to be around I think his name.

13:57

Of course, George Costanza decided to use that for his answering machine message.

14:05

By the way, to create a greatest yours. Yeah, it was Joe Scarborough he made it to what position of the billboard

14:16

number to

14:18

not break through dark. Here we come walking down the street with a monkey. To get the funniest looks, everyone.

14:29

Everyone

14:31

monkey around, is it Mickey dolenz the only one left. No,

Speaker 1

14:42

I was just thinking of. Terry Gilliam I know I've already mentioned it, but it was just sad but john Cleese tweets out to down for to go

14:52

live for Brian.

14:55

They were all appreciate. Yes, exactly. they would love, love, love, love, exciting and

Speaker 1

15:07

jack Jones or Dionne Warwick version. Come aboard we're expecting you and love life sweetest reward let it flow. It floats back to you.

15:18

The level actor you got to get work I mean, every level actor was

15:23

missing something.

15:30

And that was followed by Fantasy Island Yes, the island. I remember

15:35

making your way in the world today takes everything.

15:38

Cheers.

15:40

Taking a break from all your worries sure would help a lot. Wouldn't you like to get away every chance I can.

15:49

That's a, that's a great song, that's a solid,

Speaker 3

15:51

solid sound. I heard the friends that you actually admire the other day, I'll be there for you I'm sure we got a question

16:00

number two.

16:03

So no one told you life was gonna be this way,

16:08

by the Rembrandt's FYI, only hit 17

16:12

was also written by a Detroiter.

16:15

Does it say clap and there

16:16

it says, so no one told you life was gonna be this way

16:22

actually does this work, I thought you're supposed to

16:25

clamp it was reading it.

Speaker 1

16:27

Oh, I was just reading the state's directions furrowed brow. Okay, rubra. Thank you for being a friend. Oh I got two girls. A student showed up to my lecture the other day wearing a Golden Girls t shirt and I thought it was

16:43

originally sung by Andrew gold thank you for being a friend, hit, what position in

16:48

my 170 high silver one. Knowing for

16:53

16. Number 25.

Speaker 1

16:57

Maybe as you remember hearing it. Yeah, we did. All right, we're switching gears here, a little bit of a stronger vibe to my generation Gen X or say it's time to play the music. It's time to light the lights

17:14

to

17:18

start showing your shoulders I got

Speaker 1

17:22

this through the Kermit army just sing that song and I'm

sure your shoulders ain't waving so we have all those on DVD it's fun. I laughed, every time. What is it Kermit and the whole cast is like, it's time to get things started the audience, why don't you get back at them. Oh, so great Lucy live at the very end throwing the boomerang fish. Who can turn the world on with her smile Mary Tyler in our mind I remember saying that was, that was the head up in the air, who can take nothing day and suddenly make it all seem

17:54

worthwhile now the first season of that started out with different lyrics, though he did. okay, there's an earlier portion of that song which I can't quite remember now but give me a minute. Remember, not right now but it is quite an important part of women's lives, no question about that show she throws the hand up.

18:12

Anyway, Well, we're moving on. Jefferson, Jefferson

18:19

apartment in the sky.

18:22

We finally got a piece of the pie.

18:27

Before the Cosby's there were the Jefferson Yes,

Speaker 1

18:29

the original like solid spin off with its own following. It's a big deal, big deal with Jefferson, making black people

18:37

acceptable to white TV.

18:40

What about Louis's next

18:41

door to interracial couple

Speaker 1

18:43

was lots and lots of spin offs from that from that whole era right. The two different Lionel's. Oh yeah.

18:50

Yes, the two different Lionel.

18:53

How about sunny day. Sesame Street with grout.

Speaker 1

18:58

On my way to know the air is sweet. Thank you. Tell me. You don't have to shrug your shoulders with Sesame Street. And it's also Muppets Muppets left and right. Our whole universe was in a hot dense Big Bang. Yes. Well

yeah, I love how the whole song fits as part of the clue they basically do the last three lines and then that's the end of the song so it's like alright you know we build a wall, we built the pyramids. Big Bang Theory yes okay let's see here. Okay, not the first line but randomly from the song, men, men, men, men manly man.

19:39

Two and a Half Men.

19:42

Yes. Yeah, that's what I thought. I like

19:46

did you just like,

19:48

man.

19:50

Hold on let me check my. How many. It says men, men, men, men manly man. All right, let's see.

Speaker 1

19:58

I'm almost halfway finished How do you like it so far. How do you like the theme. Yeah. That's the sorry Sanders, no no Gary Shandling the Garry Shandling show. Gary called me and asked me to write the theme to the show so here's the thing and I'm almost halfway done. If people don't remember that. Oh, that was a great show. It was a great show. Oh my gosh, I can't believe we're at the end of these this is so salad. This is Brian you got to send us like another one more one more to go here. Let's ride with the family down the street. Through the courtesy of Fred's two feet. When you're with the Florence, you'll have a yabba dabba Doo time. Excellent, thank you very, very much for sending those people who think the earth is like 6000 years old think that's a documentary right. We actually wrote dinosaurs. Hey, BC empowered rocket ships to prove Earth is flat to so. Oh my gosh, I just love the comedy angle on all the sassy animals that are made to do all the menial tasks and like the bird that lives under there saying do

21:13

this every single

21:13

episode, you know, you know what it was based on. The
Honeymooners oh yeah

Speaker 1

21:19

that makes perfect sense. Yeah, absolutely. And then of
course the Jetsons were based on the Flintstones and
Hanna Barbera not exactly original but prolific do Rog
pack. Yeah, exactly.

21:33

Modern World,

Speaker 1

21:34

a small set of questions here from Detroit mercy students
Sara Abdullah from Mara's biochem last fall. She's

written a few questions based on her favorite TV show and boy boy does this generation love streaming the office. So we've got a few questions here. In the episode diversity day workers in the office undergo a training program on diversity. What's the reason they had to go through this program have ashamed to say that I have watched over one episode that's all right. That's all right i gotta say I lost track after a few seasons, but every time I watched. It's pretty funny. It's pretty darn from because they lacked diversity. That's partial Chris somebody made a comment. Somebody made a comment also partial credit. Michael played by famous comedian name escapes me oh my gosh, Steve corral upset all of his workers, attempting to recreate a Chris Rock comedy routine. So, everybody else had to go through,

22:39

which is classic sort of you know bureaucracy.

Speaker 1

22:43

What brand of shoes does Pam wear around the office in the first few seasons, she she really likes her back Martin's cat kegs Wyatt, how do you do kids is number, how do you do, yeah. Kids correct kids was actually. Okay. years ago you could actually order custom made kids, you can actually send in a photograph or send an artwork and then we custom make kids for you.

23:06

So it's always one of my favorite brands for my students to mock up shoes, used to work cats. And they actually got jobs at Congress at night because of

Speaker 1

23:16

sneaky in the fun run Episode What objects in Angela's freezer convinced her Dwight had killed her cat, like an extra beer and punch keys. No, no, that's a great something you'd expect to actually define in someone's freezer.

23:31

If they kill a cat.

23:33

No, it has no connection it just for some reason we're

Speaker 1

23:38

not ice cubes but partial credit frozen peas love very very close frozen corn frozen french fries, is what

23:47

I would have gotten wrong.

Speaker 1

23:50

I missed that one. All right. What does Jim train Dwight to do in the episode Phyllis wedding This is absolutely wonderful dance. Wonderful. No, actually, it is a have lobbying conditioning of epic proportions Lv not salivate swearing. No, no, no, this one huh ring a bell, so I'm going to give you 70% personal credit. Jim train Dwight played by Rainn Wilson Right, yeah. So Jim is what's what's drawn Kaczynski Brzezinski yeah that's right the Krakowski I can never remember how to say his last name, but he basically made it so that Dwight would go and get a mint, every time they heard the ding of someone logging into the system. So every time someone logged in as like ding and then he would go get the whole. That was actually pretty solid I gotta say it was very very

24:44

Dwight schrute owns a farm. What does he farm there.

24:52

It wasn't in Michigan, it was in scrap scrap nice my tell you, where's Jason when we need.

Speaker 1

24:59

Oh my gosh, one side of the state. Wrong side. Oh, that's right. You're also Pittsburgh. Yeah, which side is scam. How come I can't picture my head works credit. Eastern Eastern. Oh, every Pittsburgh screams screams way over by Philly basic. It's about an hour and a half. Okay. Sorry Dan's give us those gangster hand signs again I'm doing this really interesting sort of.

25:30

It could be Tennessee.

25:33

They got a statue of William Penn in downtown Philadelphia that makes it look like he's whizzing around

the city. I'm not kidding. Well, he probably was already pointed out to me we're downtown she's like,

25:45

why would not build a building taller than the way you can start with the gold one on

25:51

top of City Hall. That's right, yeah.

Speaker 1

25:54

Last one here which employee did Michael hit with his car. She's the, the cranky one,

26:01

played by a cranky actress yeah I can't remember her name. Sorry. It starts with the letter M

26:07

did Mimi, or is that a different show

26:10

different show. Her name was Meredith mer here. Okay.

Speaker 1

26:15

So we reached the section of our show again where we can come up with some ATP favorites. All we need is a thing to close our episode, what do people have the ability to talk about favorite Lenten memory. Now,

26:29

we did donuts last favorite. No, remember

26:33

we're supposed to do that our favorite persol episode,

26:38

we never did do though. Favorite.

Speaker 1

26:44

I mean I can tell my favorite person story. Beside. For those of you who don't, you know, watch video of s Professor does that even exist so he wears a black Ray. Ray, all the time, pretty much, especially during the winter to keep his head warm, and he's all wintered up and using our copying machine, and it was just very odd, considering the way our mics are oriented they're higher than where we're sitting. We used to have this copy machine where the arm came down and you had to press things on sort of like an elevated keypad, my former boss now colleague, Mark and I are walking by the main office and we see beside peering down his bifocals because he's a person of smaller staff or a challenge, and he's punching all the buttons and as we walk by Mark interrupts our conversation to go into the office, just press the button that says destroy capitalism make it

27:41

so hard to die.

27:45

Because it just really looked like he was

27:51

there with an array,

27:52

I don't know, that's that's my favorite story. And, yeah, I had to give it to mark that day. Yeah.

28:00

Anyway, so that's maybe Mark's story actually

28:03

yeah that's

Speaker 1

28:04

a great Mark story. Yes, I'm afraid. The time has come for us to say goodbye. Heather. Goodbye, Stephen. Goodbye. Danielle Goodbye, Stephanie. Elizabeth, goodbye, James.

28:18

And David doodle now these words, you can email ask the professor at ATP at UT mercy.edu

28:26

or

28:26

visit the Ask the professor Facebook page.

28:31

Professor strange strengths right at the facilities of the Briggs building and the Department of Communication Studies in the College of Liberal Arts and education, the University of Detroit Mercy is big Nichols campus as the professor is produced and directed by Michael Jason, and our executive producers Professor Jason Roche until next week. I'm your host Matt Meyer.
